JASON E. THOMAS

FRONT-END DEVELOPER | JavaScript • React • TypeScript

Middleburg / Jacksonville, FL | 904-505-1019 | JEThomas1130@gmail.com

Portfolio: jet380.com | GitHub: github.com/jthomas380

PROFESSIONAL SUMMARY

Front-end developer in training, U.S. Navy veteran, and business owner with an electrical engineering background. Builds responsive web interfaces and interactive applications using JavaScript, HTML, CSS, and related front-end tools. Portfolio projects demonstrate booking workflows, live calculations, API integration, and user-focused interface development. Seeking an opportunity to contribute to a professional software development team.

FRONT-END PROJECTS

That Doggone Cart | *Ordering / POS / Kitchen Workflows*

Developed a customer ordering interface linked to private back-office and kitchen views; staff manage order status and customers receive mobile updates.

Live: thatdoggonecart.com

North Florida Property Repair & Upgrades | *HTML / CSS / JavaScript*

Built a responsive business website presenting repair, upgrade, and water-treatment services with direct customer contact options.

Live: nfprullc.com

Blacktop Mobile Detailing | *HTML / CSS / JavaScript*

Created a service-booking demo with package selection, vehicle options, add-ons, appointment scheduling, dynamic pricing, form validation, and simulated deposit checkout.

Live: detailing.jet380.com

Mortgage Lender | *HTML / CSS / JavaScript*

Built a mortgage lending demo featuring payment estimates, an interactive prequalification flow, validation, and responsive navigation.

Live: mortage.jet380.com

ReelFinder Movie Database | *JavaScript / Fetch / REST API*

Built a responsive movie discovery app integrating the OMDb API, with dynamic results, sorting, loading and error states, and carousel navigation.

Live: movie.jet380.com

PROFESSIONAL EXPERIENCE

Business Owner | North Florida Property Repair & Upgrades LLC | 2018–Present

- Manage daily operations, customer communications, project planning, scheduling, estimating, and service delivery.
- Solve technical and operational problems independently; developed and maintain the company website as a separate hands-on coding project.

Aviation Electrician's Mate | U.S. Navy | 1999–2012

- Maintained and troubleshot electrical and electronic equipment in structured, safety-critical operational environments.

TECHNICAL SKILLS

Front end: JavaScript, HTML5, CSS3, React, TypeScript, responsive design, DOM manipulation, form validation

Development: Fetch API, Promises, asynchronous data, REST APIs, state handling, Git, GitHub, VS Code

Additional: C, C++, embedded systems fundamentals, Hostinger, Firebase

EDUCATION & TRAINING

B.S., Electrical Engineering & Communication Technologies | ITT Technical Institute | 2016

Frontend Simplified | Front-End Development Training | August 2026–Present
