

JASON E. THOMAS

FRONT-END DEVELOPER | JavaScript • React • TypeScript

Front-End Developer and U.S. Navy veteran building responsive, user-focused web applications. Hands-on experience with JavaScript, React, TypeScript, HTML, CSS, API integration, application state, and interactive workflows from concept through deployment.

EXPERIENCE

Independent Front-End Developer | 2018–Present

- Design and develop responsive web applications from concept through deployment, including interfaces, interactive workflows, forms, calculations, and API integrations.
- Use Git and GitHub to manage projects; deploy production websites; troubleshoot browser and responsive-layout issues; and continue building with React and TypeScript.

SELECTED PROJECTS

That Doggone Cart

Active POS • Kitchen Display • Mobile Order Updates

Built a live ordering and point-of-sale website where customer orders flow to a private back office and kitchen display. Staff update order status, and customers receive mobile notifications when orders are ready.

Live: thatdoggonecart.com

North Florida Property Repair & Upgrades

HTML • CSS • JavaScript • Responsive Web Design

Built an active business website showcasing repair, property-upgrade, and water-treatment services across Jacksonville and North Florida, with service details and direct customer-contact options.

Live: nfprullc.com | GitHub: github.com/jthomas380/nfpru

Blacktop Mobile Detailing

HTML • CSS • JavaScript • Responsive Design

Built a responsive service-booking site with package and vehicle selection, add-ons, appointment scheduling, live pricing, form validation, and a simulated deposit checkout.

Live: detailing.jet380.com | GitHub: github.com/jthomas380/blacktop-mobile-detailing

Mortgage Lender

HTML • CSS • JavaScript • Responsive Design

Created a mortgage site with a payment calculator and guided prequalification flow, including payment estimates, dynamic form state, validation, appointment scheduling, and responsive navigation.

Live: mortgage.jet380.com | GitHub: github.com/jthomas380/mortgage-lender

ReelFinder Movie Database

HTML • CSS • JavaScript • REST API

Developed a responsive movie-discovery app using the OMDb API, Fetch, and Promises. Added dynamic results, sorting, loading and error states, carousel navigation, and application-state handling.

ADDITIONAL EXPERIENCE

U.S. Navy — Aviation Electrician's Mate | 1999–2012

United States Navy

Worked with electrical and electronic systems, troubleshooting, maintenance, and complex equipment in structured operational environments.

TECHNICAL SKILLS

Front End:

JavaScript • React • TypeScript • HTML5 • CSS3

Development:

Responsive design • DOM • state management • form validation • REST APIs

JavaScript:

Fetch • Promises • async data • dynamic rendering • event handling

Tools:

Git • GitHub • VS Code • Hostinger • Firebase

Additional:

C • C++ • embedded systems • accessibility fundamentals

EDUCATION

Bachelor of Science

Electrical Engineering & Communication Technologies

ITT Technical Institute | 2016

PROFESSIONAL DEVELOPMENT

Frontend Simplified

Front-End Development Training

August 2026–Present
